TACA
Ticketing
App

<https://itunes.apple.com/us/app/xoimages-taca-ticketing-app/id1197172700?ls=1&mt=8>

HOW “TACA” WORKS?
TICKET ATTENDEE CHECK-IN
APP (TACA) is a high-tech, professional organizer app that helps event organizer to verify paid customer before entry to venue. In addition, event organizer can export a CSV format data after event to check the number of check-in attendees Prior to the start of the event, event organizer must download the “Attendee List” (CSV format) from “Media Posting” then upload to the app. Regardless of the number of entrances, the same “Attendee List” can be used to verify paid customer. One customer is allowed per entry to the venue. To avoid double entry, please tag customers with an official ink stamp on customer’s wrist or provide an official wrist band to prevent their re-entry to the venue.

		<p>HOW “EPSO” WORKS? Even though the Photo Shoot Organizer (EPSO) is a Pre-Event Ordering Version of a high-tech, professional organizer app that helps photographer to email the pre-paid customer to ordering information automatically at the event – an internet connection is required. Prior to the start of the event, the photographer or organizer must download the “Attendees List” (CSV format) from “Manage Posting” then upload to the app. If it is a multiple station event, please download each “Attendees List” for each station photographer. “Attendees List” is in comma separate value format and contains customer’s order information. Prior to the start of the event, photographer must upload “Attendees List”, enter event title, ordering site URL, Event Finder Code J, set start frame number, set frame increment, ordering instructions and terms of the photographer. During the event, the photographer just has to scan and verify the code on the customer’s invoice before allowing customer to be photographed. Upon the QR verification approval, the form page will appear that contains customer’s name and email. Photographer has the option to enter the number of people by gender before clicking the send button. The app sends an email with the ordering information together with frame number to customer email account After the event</p>

<p>XOimages EPSO - Standard</p>	<p>https://itunes.apple.com/us/app/xoimages-epso-standard/id1196829450?ls=1&mt=8</p>	<p>HOW “EPSO” WORKS? Event Photo Shoot Organizer (EPSO Standard Version) is an app that helps photographer give the Event Organizer a Photo Shoot list (CSV format) has customer name, number of photographed customers by gender and customer’s photo shoot last frame number. The Event Organizer can send the Photo Shoot List with instructions (if applicable) to the customers/members. This organized information helps customer to find their images easily, thus, leading to greater customer satisfaction. The App does not require internet connection to operate. This app is perfect when subject is under 18 years old or does have an email account. Home – Home page is also called the form page. Here customers enter their first and last name including the number of people in the photo by gender. Tapping the “submit” button stores the current entry on the phone. Envelope – Photographer taps the “Envelope” icon to retrieve the data (CSV format). Photographer will enter manually the last frame number taken of each customer in the data file before sending it to the Event Organizer for distribution to the customers/members. Counter – Photographer can view the number of entries. Tapping the “Counter” icon allows photographer to print the existing data.</p>
