Shredder - Incremental HIIT Interval Timer	https://play.google.com/store/apps/details?id=com.app.shredder HIIT has just changed. Forever. Interval Training has long been established as one of the most effective and efficient forms of cardio exercise. It can take many forms, such as Tabata thrusters, circuit training, running, cycling/ spin class and martial arts. Since its creation, the format has always been the same (1) A high intensity exercise of your choice for a fixed time (2) A rest period/ low intensity exercise period (3) Repeat The only things that have changed, are the exercises done in each high intensity interval. Shredder is a unique, innovative answer to the question "How can we improve HIIT?" Traditionally, the only way to increase the difficulty or work done during a workout would be changing the exercises or increasing the number of repetitions. Shredder has turned this on its head. It allows you to set each interval to increase (or decrease) every step. This means that you can make each interval longer (therefore more difficult) than the previous, never allowing your body the chance to adapt to the exercise. The result of this is that you will always do more work, burn more calories, and improve your cardio fitness when compared to the "old fashioned" form of Interval Training. Let's take the example below of a standard HIIT session: (1) 30 seconds exercise (2) 20 seconds rest (3) 30 seconds exercise (4) 20 seconds rest (5) 30 second exercise (6) 20 second rest In Shredder, you could for example, set each "active" interval to increase by 10 seconds, and each "rest" period to increase by 5 seconds. The work out would therefore look like: (1) 30 seconds exercise (2) 20 seconds rest (3) 40 seconds exercise (4) 25 seconds rest (5) 50 second exercise (6) 30 second rest Due to the lengthening high intensity intervals, your fitness and stamina increase exponentially. The human body is such an incredible machine, that the drawback of "traditional" HIIT is that eventually it will just become used to the period of high intensity, requiring less work, burning less calories. Most people end up wasting their time because HIIT sessions eventually become too easy, unless they increase the number of cycles again and again. With Shredder, you do not have the chance to start finding it easy. Every session can be harder and more intense than the previous one. The Evolution of HIIT begins here.

iOS Mobile Application	
Site Name	**Description**
Springfloor	https://itunes.apple.com/us/app/springfloor/id1089881050?mt=8 SpringFloor is THE next big thing in the cheerleading world. XOimages EPSO - Pre Event	https://itunes.apple.com/us/app/xoimages-epso-pre-event/id1196831225?ls=1&mt=8

HOW "EPSO" WORKS? Event Photo Shoot Organizer (EPSO) – Pre-Event Ordering Version 1 is a high-tech, professional organizer app that helps photographer to email the pre-paid customer the ordering information automatically at the event – internet connection is required. Prior to the start of the event, photographer or organizer must download the "Attendees List" (CSV format) from "Manage Posting" then upload to the app. If it is a multiple station event, please download each "Attendees List" for each station photographer. "Attendees List" is in comma separate value format contains customer's order information. Prior to the start of the event, photographer must upload "Attendees List", enter event title, ordering site URL, Event Finder Code J, set starting frame number, set frame increment, ordering instruction and terms of the photographer. During the event, the photographer just has to scan and verify the QR code on the customer's invoice before allowing customer to be photographed. Upon the QR code verification approval, the form page will appear that contains customer's name and email. Photographer has the option to enter the number of people by gender before clicking the send button. The app sends an email out the ordering information together with frame number to customers' email account After the event, photographer can retrieve the updated "Attendees List" showing the frame number, number of people by gender and claimed invoice.This app eliminates phone support, the use of papers and the loss of the ordering information form. It is perfect for event photography and it will enhance customer satisfaction and make boost the photographer/Event Organizer reputation and professionalism. Home – Home page is also called the form page. Customers enter their first and last name, email address and the number of people in the photo by gender. Tapping the "submit" button stores the current entry on the device (tablet preferred) and sends a copy of the ordering information instantly to customer's email account. Envelope – Photographer taps the "Envelope" icon to receive the data file in CSV format. Counter – Photographer can view the number of entries. Photographer can later tap the counter icon to purge the data. Setting – Photographer, prior to photo shoot, must upload the "Customer Photo Shoot List" then enter all the event information such Starting Frame (1 by default), Frame Increment (number of shots per customer), Support Email and Instruction (if any) Camera – App camera icon displays the last frame number taken. The camera's last frame number must match the App Camera icon displayed frame number. Tapping on the App camera icon allows photographer to edit the last frame to match the photographer's camera last frame number if there is a mismatch. Example: Photographer set frame increment from 3 (default) to 5 frames per customer. If photographer has taken 5 customers at 5 frames each, App Camera icon and photographer camera must display 25 as the last frame number. In case the 5th customer's don't' turn out well (eye blinks), the photographer can take extra 5 shots. Then, the photographer can tap on App Camera icon edit the last frame number of the 5th customer from 25 to 30. The 6th customer will start from frame number 31. |

Everyspot	https://itunes.apple.com/us/app/everyspot/id1332956133?ls=1&mt=8 EverySpot is a new concept for sharing economics that depicts parking spaces, as well as helping to maintain the rainforest. EverySpot allows private individuals to rent out their extra space in their driveways and earn money in a safe and secure way. As well, others have the opportunity to rent into the rented parking lot and receive secure and cheap parking and save money at the otherwise undesirable cost. EverySpot, therefore, creates a contract between two private individuals. A landlord and a tenant. For each car parked through EverySpot, 11kvm of rainforest will be maintained corresponding to the average area of a parking space. Conservation is carried out by training farmers in the tropically exposed areas, learning to grow ecologically and in the piece. EverySpot is easy and user-friendly and you can rent your drive in 1 minute and you can rent one.

Application with lots of features provides flawless solutions to manage all the unique functions . Features : - Assets Management - Tenant Management - Payment-Reminder - Worker management system - Easy to search member details - Accounting summary - Security management - Member voting

Shredder	 HIIT has just changed. Forever. Interval Training has long been established as one of the most effective and efficient forms of cardio exercise. It can take many forms, such as Tabata thrusters, circuit training, running, cycling/ spin class and martial arts. Since its creation, the format has always been the same (1) A high intensity exercise of your choice for a fixed time (2) A rest period/ low intensity exercise period (3) Repeat The only things that have changed, are the exercises done in each high intensity interval. Shredder is a unique, innovative answer to the question "How can we improve HIIT?" Traditionally, the only way to increase the difficulty or work done during a workout would be changing the exercises or increasing the number of repetitions. Shredder has turned this on its head. It allows you to set each interval to increase (or decrease) every step. This means that you can make each interval longer (therefore more difficult) than the previous, never allowing your body the chance to adapt to the exercise. The result of this is that you will always do more work, burn more calories, and improve your cardio fitness when compared to the "old fashioned" form of Interval Training. Let's take the example below of a standard HIIT session: (1) 30 seconds exercise (2) 20 seconds rest (3) 30 seconds exercise (4) 20 seconds rest (5) 30 second exercise (6) 20 second rest In Shredder, you could for example, set each "active" interval to increase by 10 seconds, and each "rest" period to increase by 5 seconds. The work out would therefore look like: (1) 30 seconds exercise (2) 20 seconds rest (3) 40 seconds exercise (4) 25 seconds rest (5) 50 second exercise (6) 30 second rest Due to the lengthening high intensity intervals, your fitness and stamina increase exponentially. The human body is such an incredible machine, that the drawback of "traditional" HIIT is that eventually it will just become used to the period of high intensity, requiring less work, burning less calories. Most people end up wasting their time because HIIT sessions eventually become too easy, unless they increase the number of cycles again and again. With Shredder, you do not have the chance to start finding it easy. Every session can be harder and more intense than the previous one. The Evolution of HIIT begins here.
